# Your Bellydance Business

## Powerful Ways to Enhance Creativity for a Successful Career in Bellydance

*Easy steps to success in the world of dance.*

### Introduction

If you have a bellydance-based business, you can carve a unique creative path as you serve others and help people flourish through the benefits of dance and dance related services. Your style, delivery and system of business are the three key areas to explore when creating and cultivating the artist and entrepreneur within. Your style is your unique artistic signature. Your delivery is the way you translate and share your creative visions and welcome others into your dance world. Your system reinforces your style and ensures successful delivery, and most importantly, makes it easy for others to support your vision and grounds it in a business sense.

You can make a rewarding full time “career” or a successful part time career if you learn how to invest your energies wisely, through your teaching and performance. It is entirely possible to make an excellent profit through dance, by understanding that it is a service that people wish to invest in... if it makes them feel great! If you can help people access this feeling, you have a market. It’s a great way to work because you can view the entire creative cycle as an energetic gift – you share your art and create a living from it, making many people happy in the process.

In this e-book you will learn how to create and market your unique business.
